**RE: Southwestern Telephone Company, Access Services Tariff (A.C.C. Tariff No. 1);
Add 64 Kbps Digital Data Service Rates**

Dear Ms. Madrid:

Enclosed please find the original and 13 copies of the following tariff sheet (s):

A.C.C. Tariff No. 1 Access Services

Section 7

First Revised Sheets 7-2 & 7-22

Section 12

First Revised Sheets 12-6 & 12-7

The purpose of this filing is to add 64 Kbps Digital Data Service to the tariff. The rates will match those charged for 56 Kbps Digital Data Service.

Revenue Support has been included with this filing.

If you have any questions, please contact me at (608) 664-4169.

Sincerely,

Rachelle A. Ladwig
Senior Administrator - Tariffs

7. **SPECIAL ACCESS SERVICE** (Continued) (T)

7.1 **General** (Continued) (T)

7.1.1 Channel Types (Continued) (T)

Digital Data - a channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 56, or 64 kbps. (C)

High Capacity - a channel for the transmission of isochronous serial digital data at rates of 1.544, 3.152, 6.312, 44.736, or 274.176 Mbps.

The customer also has the option of ordering Voice Grade and High Capacity facilities to Telephone Company hubs for multiplexing to individual channels of a lower capacity or bandwidth. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements.

7.1.2 **Service Descriptions**

For the purposes of ordering, the customer can choose from Voice, Digital Data, or High Capacity categories of Special Access Service.

Each service consists of a basic channel to which a technical specifications package (customized or predefined) (see Section 11.5 and 11.6), channel interface(s) (see Section 11.3) and , when desired, optional features and functions (see Section 11.5) are added to construct the service desired by the customer.

Predefined and customized technical specifications packages will be provided by the Telephone Company or in conjunction with the primary carrier where technically feasible and subject to availability of equipment or in accordance with Section 10 following. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order. When a customized channel is ordered, the customer will be notified whether additional costs will apply. In such cases, the customer will be given an estimate of the hours to be billed and given the opportunity to change the order before any further action is taken.

(T)

7.5 Digital Data Service

7.5.1 Basic Channel Description

A Digital Data channel is a channel for duplex four-wire transmission of synchronous serial data at the rate of 2.4, 4.8, 9.6, 56, or 64 kbps. The actual bit rate is a function of the channel interface selected by the customer. The channel provides a synchronous service with timing provided by the Telephone Company through the received bit stream. Digital Data channels are provided as either hubbed or non-hubbed services between customer designated premises or between a customer designated premises and the Telephone Company hub(s) or interconnection point.

(C)

The customer may provide the Channel Service Unit-type equipment or other Network Channel Terminating Equipment associated with the Digital Data channel at the customer premises.

Complete listings of additional information are set forth as follows.

Compatible Channel Interfaces	section 11.3 and 11.4
Optional Features and Functions	section 11.5
Technical Specification Packages	section 11.6

Rates and charges for Special Access Digital Data Service are as set forth in section 12.2.3.

The Telephone Company will work cooperatively with the primary carrier and the customer to provide the customer desired specific service, subject to the availability of equipment.
